## LIST OF RAJES OR PEOPLES

[illegible]

1. *Chlorophyll a* (Chl a) is the primary photosynthetic pigment in most plants and algae. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl a is essential for the light-dependent reactions of photosynthesis, where it converts light energy into chemical energy.

2. *Chlorophyll b* (Chl b) is an accessory pigment found in green plants and algae. It is a yellow-green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl b transfers the absorbed energy to Chl a for use in photosynthesis.

3. *Carotenoids* are a group of pigments that include carotenes and xanthophylls. They are responsible for the yellow, orange, and red colors seen in autumn foliage. Carotenoids absorb light energy in the blue and green regions of the visible spectrum and transfer the energy to Chl a.

4. *Xanthophylls* are a type of carotenoid that are responsible for the yellow color seen in autumn foliage. They absorb light energy in the blue and green regions of the visible spectrum and transfer the energy to Chl a.

5. *Anthocyanins* are water-soluble pigments that are responsible for the red, purple, and blue colors seen in autumn foliage. They are not involved in photosynthesis but are produced by plants as a defense mechanism against herbivores and pathogens.

6. *Flavonoids* are a group of pigments that include flavones and flavonols. They are responsible for the yellow and white colors seen in autumn foliage. Flavonoids absorb light energy in the blue and green regions of the visible spectrum and transfer the energy to Chl a.

7. *Phenolics* are a group of pigments that include phenols and polyphenols. They are responsible for the brown and black colors seen in autumn foliage. Phenolics absorb light energy in the blue and green regions of the visible spectrum and transfer the energy to Chl a.

8. *Anthraquinones* are a group of pigments that are responsible for the red and purple colors seen in autumn foliage. They are not involved in photosynthesis but are produced by plants as a defense mechanism against herbivores and pathogens.

9. *Anthrazones* are a group of pigments that are responsible for the red and purple colors seen in autumn foliage. They are not involved in photosynthesis but are produced by plants as a defense mechanism against herbivores and pathogens.

10. *Anthracenes* are a group of pigments that are responsible for the red and purple colors seen in autumn foliage. They are not involved in photosynthesis but are produced by plants as a defense mechanism against herbivores and pathogens.

Sworn to before me this        day of MAY, 1920.  
at NEW YORK.

NOTE: If a surgeon sails with the vessel, this affidavit of verification shall be verified before an immigration officer at a port of arrival, and any changes that may have occurred since the condition of any of the aliens must be noted on the manifest before the affidavit is verified.  
If no surgeon sails with the vessel, the affidavit of verification shall be verified at the port of departure before an immigration officer or a duly authorized administrator.

HEAVEN NORTH

The people who are natives of the banks of the River Po in northern Italy (i.e., compartments of Piedmont, Lombardy, Veneto, and Liguria) and their descendants (who then reside in Italy, Switzerland, Austria, Hungary, or in other countries) should be classed as "Italian, north." Most of these people speak a Gallo-Italic dialect of the Italo-Roman language.

I, P. ## INSTRUCTIONS FOR FILLING ALIEN MANIFESTS

Separate sheets should be prepared for each port at which passengers embark.

Column 2 *Head or identity*: steamship lines should make no entries in this column. The space is for need to Government officials only.

Column 4 (c): The answer in this column should be expressed in years or months, the latter applying only to those under 1 year of age.

Column 6 (*Married* : *single*) The answer should be "Married," "Single," "Widowed," or "Divorced."

Columbus *de la Alhaja*.<sup>1</sup> This article should be more accurately, possibly, be captioned "The Problem of the Healthiness of the Example of Columbus," since the author does not deal exclusively with Columbus. There is nothing, in the article, which would not simply encourage, rather than hinder, the reader to make his own conclusions. A distinction should be made between the actual and the subjective quality of the example of Columbus, as follows:

A farmer is one who operates a farm either for him self or for others.  
A farm laborer is one who works on a farm for the farmer who owns it.

<sup>18</sup> Some, but not all, companies should make disclosures about their environmental practices, and such disclosures should be made, if necessary, by means of a "good" or "bad" disclosure rather than a "bad" examination of their records.

Column 8: *able to read and write*. This column is a somewhat broader column, containing the full wide question: 'Read what language[s] + if, even when + I cannot I upon what ground[s]?' In the writing this question the language or languages of the alien is table top of broad be stated. If then is unable to read and change even so, in the reading result, the table top of broad be stated and the table top of broad be stated for a column.

Column 9: *Nationality* - Country of origin; he is considered to mean the country of which she was a citizen or subject.

\* A column 10-15 cm. high. See list of trees printed on back of this sheet. The entry "hard" shows the wood is probably as hard as the wood in the column.

Special attention should be paid to the distinctive features and the symmetry of which characters exhibit contraposed test parameters (one – a and symmetry of birth, and  $n$  – number of subjects should be carefully

Column 11 (*Place of permanent residence*) – A respondent's place of residence for the past year should be indicated. The respondent in which they resided with the intention of remaining one year or more should be the last permanent residence regardless of length of actual residence there. the fact that, by means of the theory of the *incommensurable*, we can demonstrate that law is a question of *intention*. For *incommensurable* does not only have a subjective but also an objective meaning. It is a question of how many of the possible exceptions to a generalization are actually intended. In this way, the question of the *incommensurable* is the question of the intended law. It is a question of the intended law and of the intended exceptions to the intended law. The intended law is the law that is intended by the legislator. The intended exceptions to the intended law are the exceptions that are intended by the legislator.

## INSTRUCTIONS FOR FILLING ALIEN MANIFESTS

Separate sheets should be prepared for each port at which passengers embark.

Column 2: *Head for business*. Steamship line should make no entries in this column. The space is for use of Government officials only.
